

## **Instructions for the ML-I Course Project**

- ✓ Each team needs 3-5 members, with one designated team leader responsible for maintaining communication.
- ✓ The topics need to be related to the “**Selected Theme**” which I will announce. Unique and research-worthy topics will achieve higher marks. Try to avoid straightforward, mundane, & old topics.
- ✓ Teams will share their team info & topic in a single Google Excel file shared with me (rivan.buet@gmail.com). The CRs will ensure my access to that Excel file. There will be the following columns “Team No.”, “Name of Team Members”, “Roll of Team Members”, and “Topic Title”. Mark the name of the Team Leader with Red colored font. You must finalize your team within “**Team Finalization Deadline**” in that Excel sheet. You can still change/update your topic after the Team Finalization Deadline. Multiple teams cannot have same topic. So check other teams’ already chosen topics before finalizing yours.
- ✓ The course project will have two deliverables – one draft submission and one final submission. You will receive my feedbacks after the draft submission and need to incorporate them before submitting your final submission.
- ✓ For the draft submission, the team leader will record his/her team’s speech. Then he/she will upload that recording along with the slide and the literature review Excel file in the designated folder (titled “Team-X”) inside the folder “Draft Submission” in the Google Drive. Name all your individual file as “Course Project by Team X-Draft”. The CRs will maintain the Google Drive and share with me. This must be done within the “**Draft Submission Deadline**”. There will be no presentation in the class.
- ✓ Each team will have a maximum of 6 minutes for the speech. Exceeding the time limit will result in negative marks. Everyone don’t have to take part in the speech. It’s fine with me even if just one member of the team gives the whole speech.
- ✓ If you need to discuss any urgent issue regarding your project outside my class, the team leader can text me the issue on WhatsApp. If you are interested in publication, you are welcome to keep in touch with me after your final submission.

- ✓ Remember to put slide number in the slides. Avoid unnecessary animations. Avoid putting paragraphs in slides. Texts should be concise. I don't care if you use any AI inspired tools such as Canva to make the slides. But your slides need to have enough information in them and you need to be able to explain everything. Canva can be a good starting point, but never good enough for the final product we are looking here.
- ✓ I will provide feedback on your draft submission to the corresponding Team Leaders. Based on my feedback, you need to update your draft submission and prepare the final submission.
- ✓ I expect a very detailed literature review (covering 20-25 Q1-Q2 papers), a well-thought methodology, and a data collection framework for Bangladesh.
- ✓ It's important to know whether your claims and understanding of your research are based on papers from Q1-Q2 journals. Q1-Q2 journals are generally reliable as they maintain ethics and strict publishing reviews. Of course, there are exceptions. But this is mostly true. Hence, we prefer papers from Q1-Q2 journals. You are encouraged to use two Chrome Extensions which provide a quick view of journal quartile rankings in Google Search. Please install them so that you can quickly identify the journal quartiles. They are – “ExCITATION Journal Ranking” and “Rapid Journal Ranking”. Sometimes these two extensions disagree. Then you go to the basics and search your journal in the <https://www.scimagojr.com/>.
- ✓ Search the papers in Google Scholar first. If unavailable, then search in other known platforms. If you find a paper super relevant, but inaccessible, the team leader can send me the link on WhatsApp. I will search when I am free.
- ✓ You don't need to put your whole Literature Review in the report as a table. You can break the review into multiple tables and edit it to make it appropriate for the report.
- ✓ For your final submission, submit both the Word and PDF files of the report, an Excel file containing the literature review summary, and the final PPT slide in the designated folder (titled “Team-X”) inside the folder “Final Submission” in the Google Drive. Name all your individual file as “Course Project by Team X-Final”. This must be done within the “**Final Submission Deadline**”. No need to submit the hard copy of the report.

- ✓ For the report, use Times New Roman font with size 12, line spacing 1.5, and both-side justification in general. Provide page numbers.
- ✓ The report should contain the following sections and subsections.

## Abstract

### 1. Introduction

- Background
- Motivation
- Organization of Report

### 2. Literature Review

- Current Knowledge
- Literature Review Tables (with columns including (but not limited to) Paper Identifier, Publication Year, Journal Name, Journal Quartile, Country of Analysis, Data Type, Temporal Range, Method)
- Research Gap
- Research Objectives and Questions

### 3. Research Methodology

- Flowchart explaining the overall framework
- Table of Notation including variables & parameters
- Mathematical Representation

### 4. Data Collection Plan

### 5. Conclusion

- Summary
- Limitations

### 6. Reference (APA format)
